

Watch The Homemade Ariel Atom Killer Pull Some Smoky Burnouts

25/04/2013 21:26 by admin

This weekend we featured a story from guest contributor Max Prince about the "Coyote," the tire-murdering "battle axe" built from spare parts at Missouri tuner shop Nocturnal Motorsports. Both the car ? a tube frame rig powered by a 280-horsepower Nissan SR20DET engine and weighing in at a mere 1,400 pounds ? and the story were a big hit with you guys. But at the same time, more than a few of you asked this question: "Where's the video?" Well, asked and answered. In case you weren't completely convinced of the Coyote's awesomeness, check out this video he just sent us. The car's fabricator, Mike O'Mara, grabbed a GoPro and recorded some backroad hoonage at his family farm, Max tells me. The result is video evidence of how great/terrifying the homemade speed machine is. Would you go for a ride in the Coyote?[...]
