

The Engine Of The World's Next Fastest Car Lives And Has 1,350 Horses

22/08/2013 15:39 by admin

The Bugatti Veyron Supersport has 1,200 horsepower and can go 267 MPH. The Hennessey Venom GT has 1,244 horsepower and can go 265. That's what the SSC Tuatara will have to beat when it goes into production. And with 1,350 horsepower on premium gas, it's on its way.
