

'Central 20' Tunes into the Nissan 370Z

08/02/2009 22:50 by admin

If there's one thing that Nissan 370Z owners don't have anything to worry about, that's the availability of all sorts of tuning packages for their sports coupe, some even from companies that most of us have never heard of before. One of the less well-known tuners is 'Central 20' from Japan that has released a new sport package for the 370Z. Their package includes a bodykit with a longer front bumper, side sills and a new rear bumper with side air-vents that brings to mind the Audi R8 but does not seem to tie-in with the rest of the car's looks.

'Central 20' also offers a set of black alloy wheels, new quad exhaust tailpipes, a sport suspension that brings the 370Z closer to the road and a more powerful brake system with 4-piston calipers up front and 6-piston at the rear.
