

BMW M6 Lowered on Asymmetrical TWOFACE 3-Piece Wheels from MbDESIGN - Photo Gallery

05/05/2015 19:08 by admin

The annual Worthersee car meet has a habit of attracting the weirdest tuning projects from across Europe. This one takes the cake though, as German wheel specialists mbDESIGN GmbH have revealed a brand new wheel design they called "TWOFACE". As the name suggests, this design has something in common with one of Gotham City's villains, as the face of the alloy is split down the middle. One half has regular split spok... [...]
