

RUF Dakara

07/03/2009 11:10 by admin

The High Luxury SUV built by RUF is named Dakara and is based on the Porsche Cayenne. The exterior and interior is able to embrace the most ambitious wishes. Because of the 911-headlights, the Dakara affects like a sports car. Four 22 inch- five spoke wheels and the broadened fenders demonstrate pure power. The bodykit fits to every Cayenne. Cameras in the front and in the back of the Dakara cater for the panorama view. The interior room is affected by complex processed leather trim which does not only fascinate with the precious materials but also with the new designed seats. A High-End Multimedia system with TV-reception, access to the internet and a CD-/DVD-Changer will gratify even the highest requirements. The V8-Turbomotor offers an engine output of 600 horsepower (600 Ps) at 6000 rpm. The maximum torque of 659 lb-ft/lbs (890 Nm) is delivered at 3000 rpm. So the Dakara is able to reach the speed of 62 mph (100 Km/h) in 4,8 sec. The chassis as well as the brake system are adjusted to the high requirements. Even ceramic-composite brakes are available. The Dakara perfectly ties in with the RUF model-range.
