Mercedes S-Class tuning by FAB Design

Attractive bodywork design in optimal harmony of forms: FAB DESIGN makes the new Mercedes Benz S-class (W221) even more exciting.

“The face in the crowd” is the motto of the aerodynamic parts by FAB DESIGN complete bumper for front and back of the car. The bumpers can be easily exchanged from the standard bumpers thanks to the use of the standard fixing points.

The FAB DESIGN front spoiler energetically cuts through the air stream and gives the luxury limousine a new face with its round shape and the large air intakes for cooler and brakes.

The FAB DESIGN side skirts make the Mercedes look visually longer and lower. The new FAB DESIGN rear bumper does not only make the back of the car look more attractive, but it also has a cut-out in its lower wing for the FAB DESIGN quadruple-pipes sports exhaust system made out of stainless steel.

The individual look can be furthermore accentuated with the 6 hole spoke design, 3-piece forged FAB DESIGN type 6 Evoline alloy wheels at the front axle 9J x 20 ET 32 with 255/35 ZR 20 and at the rear axle 10J x 20 ET 36 with 285/30 ZR 20 Dunlop high performance tires.

FAB DESIGN can offer to customer the FAB DESIGN FK 5.0 K Supercharged Engine. The 5-liter V8 engine is equipped with a FAB DESIGN® supercharger. At 5500 rpm the engine heaves a whopping 540 hp onto the crankshaft. The FAB DESIGN® supercharger found its rightful place between the cylinder banks. This location provides the short induction lengths necessary for superfast response times. The FK 5.0 K reaches its torque maximum of 750 Nm at just 4,000 rpm. Thus equipped the S-class accelerates in just 4.9 seconds from 0-100 km/h and is not satisfied until the needle indicates a top speed of 296 km/h.
