

Porsche 911 GT2 Bi-Turbo with 680HP by Wimmer RS

15/05/2009 20:29 by admin

Feeling the need for more speed? Don't worry, German tuning house Wimmer Rennsporttechnik Solingen (RS) has it all figured out for you as long as you have a Porsche 997 GT2 and something in the likes of €29,800 or about \$40,500. The tricked out GT2 gains reworked twin-turbochargers, an improved ECU, sport camshafts and a custom made sport exhaust system for a total output of 680HP and 870Nm or 641 pounds of torque, up from the stock car's 530HP and 505 lbs/ft.

Together with a new sport clutch system, Wimmer RS' 911 GT2 accelerates from zero to 100km/h (62mph) in 3.4 seconds, to 200 km/h or 124mph in just 9.78 seconds and to 300km/h or 186mph in 25.8 seconds. The modified GT2's top speed is said to reach 356km/h or 221mph.

Other improvements included in the package are new 20-inch Sportec alloy wheels in Dunlop tires size 235/20 up front and 325/25 at the back, upgraded suspension and carbon fiber door mirrors and rear lip spoiler along with new decals.
