

Audi S8 by Mariani

15/06/2009 15:44 by admin

Mariani has released their latest tuning package for the Audi R8. It offers a combination of aesthetic and performance upgrades that definitely make this an improvement over the stock model. The car has been lowered 60mm and there is also a Euro stretch treatment of the tire/wheel combo (19inch front and 20 inch rear wheels). Mariani has added 51hp to the 5.2L V10 engine that increases the total hp to 501hp. The vehicle's low stance gives it a wide look that makes it very cool to look at but probably not the best option to drive on a daily basis.
