

Alfa Romeo MiTo Aero Kit by Lester

25/06/2009 22:27 by admin

While Alfa Romeo enthusiasts are awaiting for the Italian company to release a punchier variant of the MiTo in the form of the production version of the 240HP GTA Concept, tuners across Europe are presenting their own proposals for the stylish sport hatch. What Lester lacks in under-the-hood performance upgrades, the Italian tuner tries to compensate with a variety of styling parts that include a front spoiler, a rear diffuser, numerous roof spoilers, beefier side skirts, 8C Competizione-like side air vents and a hood scoop.

Lester's offerings also include a uniquely styled woofer housing that essentially eliminates the trunk space while the Italian company said that the car pictured here also features 18-inch mulitspoke alloy wheels shod in Yokohama tires (215/40R18), a suspension kit from H&R and a sport exhaust system from Inoxcar.
