

Caractere styling kit for Audi Q5

01/07/2009 20:52 by admin

This October the car tuner Caractere will introduce a new styling kit for the Audi Q5. If ever there was an official S or even an RS version of the Q5 this Caractere would probably stand a good chance of being picked off the designs queue.

The kit consists of a complete front bumper that is compatible with the company's S-line version. Other pieces include the roof spoiler, a ten-piece set of wheel arch extensions (also compatible with the S-line version) and a rear hatch blend. Lastly the rear spoiler, with or without exhaust with left and right tips is installed.

All the aforementioned parts are made from PURim. The CW1 wheels fitted are already on offer for this kind of vehicle. These are 18-inch, 19-inch and 20-inch in size.
