

Fiat 500 Abarth with 200hp by Karl Schnorr Kraftfahrzeuge

26/08/2009 22:23 by admin

The Fiat 500 Abarth is currently the head in the range of Fiat. Those who wait for a really fast 500 will be satisfied as soon as this athlete passes through the school of capacity of tuner Karl Schnorr Kraftfahrzeuge.

But one step after the other!

Schnorr leverages the visual appearance up by using sporty parts. The aluminium rims from OZ in red (Seria Rossa) and in size 7x17" are worth 1.090,00 Euro fitting and vehicle inspection registry included. An improvement for sure, the "normal" Abarth looks much more athletic.

Schnorr promises a better road holding after having built in a special coilover kit which lowers the Fiat a few millimetres and charges the account with 1.270,00 Euro fitting and vehicle inspection registry included. For the measurement of the axis will be charged 85,00 Euro and for the adaption of the body 285,00 Euro. No question the serial Abarth accessories emphasize the outline of the Fiat is skilfully. They continue the dynamic layout of the line in a modern way and make hungry for way more. Power Level I (163 hp - 950,00 Euro) from Schnorr offers for the 1,4-motor with serial 135 hp an improved performance of 28 hp and 45 Nm. At power level II (5.050,00 Euro) you should buckle your seat belt very tight. An aligned engine software in combination with a sport exhaust system with a big turbo charger gives the Fiat 500 the additional 65 hp. Besides the improved performance from 135 up to 200 hp the maximum hinge moment rises definitely. It can keep on carrying Euro 4-Norm.
