

Audi R8 V10 by ABT Sportsline

31/08/2009 12:43 by admin

ABT Sportsline, Audi tuning specialist from Germany, has released its first details of its tuned Audi R8 V10.

The ABT Sportsline Audi R8 V10 is powered by a tuned 5.2-liter FSI V10 engine that produces 600 hp (441 kW), an increase of 75 hp from the stock 525 hp (386 kW) and 530 Nm of torque.

The ABT R8 now sprints from 0 to 100 km/h in 3.8 seconds, 0.1 seconds faster than the stock R8. The top speed meanwhile is at 322 km/h (200 mph).

With the increase of power, ABT Sportsline equipped the R8 with an adjustable sports suspension system.

ABT's DTM division designed the body kit featuring an ABT front grille, new front air dams, new side skirts, a rear apron and a rear spoiler.

Other features include a 4-pipe exhaust system and ABT AR and BR 20-inch wheels.
