

Aston Martin V8 Vantage by MWDesign

02/09/2009 14:25 by admin

MWDesign is about to release their upgrade package for the magnificent Aston Martin V8 Vantage. Apparently, they have been quite serious about this project as they have firstly made a virtual digital concept model of it for tests! MW's Vantage features some visual tweaks which help with the aerodynamics, and also packs more power. They have also come up with a good name for it: the Helvellyn Frost!

The car is equipped with adjustable H&R to manage the proper height of the vehicle and M14 (Modulare-MWDesign collaboration) forged wheels wrapped in high performance tires Michelin Pilot Sport PS2's 255/35/20 in the front and 285/25/20 in the rear.

The MWDesign V8 Vantage powerkit includes race exhaust system, high flow 200 cell catalysts and engine software retune. This powerkit boosts the engine to 445hp. One of the typical characters of this car is the sound coming from the mighty handbuilt V8 engine. Last the small details had to be addressed. To match the color theme's contrast and the matte black wheels, matte black was applied to the side vents, front grill, window trims and trunk lip area.
