

## GEMBALLA GT Wheels for Porsche Panamera

15/10/2009 17:24 by admin

Gemballa is still developing the Mistrale Panamera based on Porsche's four-door sedan. Showcased here instead is a set of wheels fitted in the Panamera. The tuner's website states that they come in two styles; a 22-inch GT Sport wheel with tyre sizes 265/30/22 at the front and 315/25/22 on the rear, as well as the 22inch GT Sport - Rs with some riveting on the outside edge available in 22 and 20-inch.

TechArt might have stolen the march on other tuners by being the first to present their Panamera tuning programme at the recent 2009 IAA, but Gemballa is not waiting around for others to do the same. Hopefully, at the coming Essen Motor Show we will know exactly what its engineers are cooking.
