

Lamborghini Gallardo by Wheelsandmore

03/11/2009 21:38 by admin

Here's another variation on the Lamborghini Gallardo LP 560-4. This one, called the YarroW, is from German tuner Wheelsandmore.

First up, power on this Lambo is amped up to 620 hp and 580 lb-ft of torque (785 Nm). Wheelsandmore achieves this increase by means of ECU tampering, a carbon airbox and a stainless steel exhaust system with valve control.

The YarroW also comes with a beefed-up brake system to match those extra horses. 8-piston calipers are fitted at the front and 6-piston ones for the rear wheels, with 14.96 and 14.17-inch discs at front and back, respectively.

20-inch wheels are also part of the tuning kit, wrapped in 235/30/20 Dunlop Sport Maxx tires at the front (for the 8.5 x 20" rims) and 305/25/20 at the back (11.5 x 20"). The 3-piece forged rims are lightweight and come in various color and surface configurations.

The suspension gets a special coilover installed that goes up to 1.77 inches by hydraulic lift.

Carbon parts added to the exterior include a rear diffuser, frontflap and side mirrors. Carbon finish is also part of the interior redecorating.
