

VW Scirocco by MR Car Design

05/11/2009 14:30 by admin

Tuner MR Car Design is specialized in refining upscale sports cars. MR Car Design launches a special edition based on the new Scirocco. This special edition convinces through a lot of design as well as horsepower.

The series engine of the Scirocco is very sporty. The series output rises to 370 hp and 519 Nm by optimizing the software, Downpipe and MR Car Design Stage Turbo kit 3. The backpressure optimized, manual welded, sport exhaust system from MR Car Design, made of steel and with TÜV certificate adds up to the optimal Power output and the muffled thunderous sound. MR Car Design installs furthermore the 35% fins limited slip differential - therewith the speed gets on the road without wheelspin. With these changes the DSG-Software has to be adjusted.

MR Car Design mounts a Stoptech high performance brake system with 4-pistons an two-pieces slotted discs size 355x32 mm. The brake system is completed with the inovative bleeding valve from Stahlbus.

New to the assortment are MR Car Design, 20" 1-part Emotion Wheels (Strada) aluminium rims. Hankook hoops the Scirocco with S1 EVO High performance tires (235/30 ZR20).

The bold on Tuning-Bodykit from Rieger consists of a front apron, side skirts, rear valance with diffuser optics.KW Automotive adds to the ready for the race track set up with the approved V3-coilovers.

Cover EFX (CFC Styling station) takes care of the outer appearance. The car gets a sporty foliation and places with the expressive design elements an extra optic highlight.
