

VW Touareg Royster GT 460 by Hofele

10/11/2009 21:25 by admin

The giant 12-cylinder VW Touareg has been given a wide body treatment by tuner Hofele Design. Called the Royster GT 460, the word GT really suits it because well, it's no more a SUV! It has ground clearance of a sportscar and is fitted with 22-inch wheels wrapped with high performance street tires. Now you have a 480 hp high-riding Grand Tourer!

The Royster also features a nice body kit with revised bumpers that has daytime running LED lights at front and new tailpipes along with a new diffuser at the back, as well as new side skirts which by the way make the car closer to the ground!

Apart from the massively flared wheel arches, this wide body Touareg also has new rocker panels and a power dome on the hood, all reflecting on the great amount of power in its heart. It sports 9Jx20 wheels at front and 10Jx22 at the rear.
