ATT Autotechnik - Doppelturbo-Cabriolet, BMW 335i

Let's face it, in the history of BMW there has been no better BMW 3 series convertible, besides the M3. If you like to drive fast and topless, here you are seated just right. The dual turbo six-cylinder car from ATT out of Rastatt convinces primarily through its increased engine power to spectacular 362 hp and 536 Nm.

The tuner offers two power enhancements. At power level I (2.355,00 Euro) the 335i achieves 345 hp and 481 Nm by the use of an additional controller. At power level II (4.130,00 Euro) the bi turbo achieves entire 362 hp and 526 Nm - therefore accountable is not just the additional controller but also the stainless steel sport exhaust system, which adds to the ideal output effect.

Big ATT TEC LeMans 20" wheels emphasise the futuristic appearance of the ambitious athlete. The aluminum rims in the dimension 8,5x20" and 10x20" with high performance tires from Michelin "Pilot Sport 2" size 245/30 ZR20 and 285/25 ZR20 are worth 3.475,00 Euro, mounting and balancing included.

New in the range are the design fender in M3-optics. For 1.843,00 Euro you can get these from ATT already with original M3-louver, boxes, mounting accessories and LED blinker. For additional 597,00 Euro the fender can be ordered in Rastatt in car body color.

Furthermore a complete carriage and interior program is already available!
