

World's Fastest Porsche 911 by 9ff

03/01/2010 18:17 by admin

Porsche tuning specialist 9ff built the world's fastest road-going Porsche.

The record beating car is based on a regular 911 Turbo, and recently managed to hit a top speed of 391.7km/h at the ATP automotive testing circuit in Papenburg, Germany.

It has 3.6 litre flat six engine with double larger turbochargers, modified intercooler, sport cam shafts, revised ECU, high flow exhaust, sport air filters and some other small tweaks. The engine produces 1000hp @ 7800rpm and 1040 Nm. This allows the 9ff's TR-1000 to accelerate from: 0-100 km/h in 3.2 sec 100-200 km/h in 4.8 sec 200-300 km/h in 8 sec 300-360 km/h in 16 sec 9ff thinks the car could eventually beat 400 km/h with improved aerodynamics and sport tuned suspension.

This particular car was built for 25-year-old girlfriend of a Greek millionaire and took almost 2/3 from the retail price of the base car or approximately €130,000

We will only say: Long live the girlfriends!
