

JE Design Styling Kit for VW Polo V

12/02/2010 21:39 by admin

[JE Design](#) is well known for tuning VAG cars now have taken on the Volkswagen Polo V. The car tuners created a unique package with a new aero kit.

The body kit features new rear spoiler, redesigned front bumper, rear bumper, side skirts, headlight eyebrows and integrated in the front bumper LED daytime running lights. Other styling mods are a center mounted stainless steel exhaust system and suspension. There are two chooses for lowering the Polo V – KW coilover suspension kit, or a budget one – just lowering springs. The coilover kit lower the car up to 65mm while the springs variant only lower it 35mm.

Wheel choices include 17 or 18 inchers finished in 'shadow silver' or black matt.

The interior of the JE Design Polo V received a complete leather treatment with orange embroidered logos on the seats that are heated. There is an option of massage system placed in the seats.
