

## VW Golf R32 by Senner Tuning

07/03/2010 20:38 by admin

New tuning package is now available for the Golf V R32 from Senner Tuning.

It starts with boosting the engine power up to 270hp. That power upgrade comes with installing new BMC airbox made from carbon, a stainless steel sport exhaust and ECU tuning.

The package also supplies the R32 with a new adjustable sport suspension.

The wheels are 3-piece alloy 20-inch fitted with 235/30/20 Dunlop Sport Maxx tires.

The Senner's R32 received heat treated cross-drilled brake disks and performance brake pads.

For the body Senner Tuning provides front grill inserts, a roof spoiler, a rear diffuser and side-mirror housings all made from carbon fiber.

The R32 also gets LED daytime running lights integrated in the air intake pockets of the bumper fascia.
