

## Mercedes SLK 55 AMG by VATH

28/03/2010 17:27 by admin

Engineers from VATH released their latest tuning program. Of course it is based on Mercedes vehicle - SLK 55 AMG. There are changes in all over the car.

The exterior kit include black carbon fiber front lips and a rear diffuser. 19-inch wheels "dressed" in 235/35 at the front and 275/30 at the rear cover the six-piston brake system with 378-millimeter brake disks installed.

Thanks to the new sports pistons and polished cylinder heads the original 5.5-liter V8 is now 5.8-liter. Along with the installed compressor and the new air filter the power now is 565hp. which is 205hp. more from the original.

Other technical upgrades include a performance chassis, an optional differential lock, steel catalyts, a long-stroke crankshaft and exhaust manifolds.

For the interior from VATH offer a sports steering wheel with leather, carbon or fine wood trimming, depending on the customer's wishes.

The whole package will cost you &euro;30,785.
