

## VW Golf VI GTi by Rieger

16/04/2010 10:17 by admin

German tuner, Rieger brings us a new [tuning](#) package for the Golf GTI sixth generation. There is no information about the performance figures so all we have at the moment is the body kit.

It includes aesthetic modification, new sport exhaust and a set of wheels.

Exterior modification includes a lip spoiler kit with a fiber glass mesh and ABS inserts, lip spoiler middle splitter, side skirts with cutouts, a roof spoiler and a rear bumper diffuser from carbon fiber.

The exhaust features a muffler with dual oval tips and an ESD exhaust sound control system.

Wheels and tyres used for the project are 20" OZ VA 8.5Jx20 ET 38s with 235/30 and HA 8.5Jx20 ET 38s with 235/30 front and rear respectively.
