

VW Golf VI GTi 'Razor' by RevoZport

21/04/2010 13:56 by admin

RevoZport has unveiled a new styling package for the Volkswagen Golf VI GTI. It is based on the [RZR version](#) from back in January. The package is available in three different stages.

The aerodynamics package of the Volkswagen Golf VI GTi Razor includes a new front bumper with integrated LED daytime running lights which are designed to fit the exact curvature of the front bumper and to keep the original lines. The Golf VI GTi Razor kit also includes a 4kg lightweight carbon reinforced bonnet, a roof-mounted spoiler, aggressive side sills and an adjustable front splitter that has 2 adjustment for different downforce .

The front and rear wheel tracks are now 25mm and 35mm wider than normal allowing owners to fit staggered wheels and much wider tires.

There is no information on pricing or availability, but RevoZport says they are now developing a 290hp engine mapping program, a new exhaust, and a high performance intercooler.
