

## 2011 Scion iQ by Five Axis

30/04/2010 09:50 by admin

The 2011 Scion iQ has just been launched and already it has received its first tuning program. The customization program comes from Five Axis and will be shown at the New York International Auto Show.

The car received significant changes both outside and inside.

New aerokit with new fender flares stands for the exterior modifications.

18-inch (7.5x18") wheels painted in titanium with a dark chrome line wrapped in Yokohama S.drive tires cover the TRD brakes installed, with four-piston front, two-piston rear calipers. The 2011 Scion iQ received also a Tein suspension.

Pricing on the package of upgrades has not been disclosed.
