

The COBRA N+ Tuning Concept for the New Nissan GT-R

05/01/2009 14:27 by [click here for more information](#)

The Nissan GT-R reaches for the stars on the wings of a twin-turbo 3.8-liter V6 engine with 485 hp / 356.9 kW and permanent four-wheel drive. The development of an extensive tuning program at COBRA N+, the division of Cobra Technology & Lifestyle that exclusively deals with the customization and tuning of Nissan automobiles, is running at full steam.
